

## ENVIRONMENTAL POLICY

**Mizkan Europe Ltd** respects and learns from nature and the life it gives. We are grateful for the wonder of nature and aspire to nurture the health of our planet and enrich the lives of people.

We recognise our responsibility to protect the environment in which we operate and are committed to continually improving environmental performance and supporting sustainable development across all our activities. Mizkan will encourage our business partners and all external stakeholders to join the efforts towards sustainable future. We also recognise climate change as a global challenge and commit to reducing our greenhouse gas emissions and managing climate-related risks and opportunities.

### **Our Key Environmental Impacts**

We recognise that the key environmental impacts under our control and influence include:

- Use of natural resources
- Discharges to water services
- Emissions to air, including greenhouse gas emissions (Scope 1 and Scope 2)
- Indirect emissions within our value chain (Scope 3), including supply chain and logistics impacts
- Generation and management of waste

### **Our Commitments**

Mizkan Europe Ltd will:

- Comply with all applicable environmental legislation and other compliance obligations.
- Maintain and continually improve our Environmental Management System in line with ISO 14001.
- Prevent pollution and reduce adverse environmental impacts arising from our activities.
- Reduce energy and water consumption through efficient processes and technologies.
- Reduce GHG emissions and support carbon footprint reduction across our operations and value chain.
- Apply the waste hierarchy to promote reduction, reuse and recycling.
- Consider environmental and climate impacts in business planning and investment decisions.
- Engage suppliers, customers and employees in improving environmental performance.
- Set annual environmental objectives and targets, monitor progress and communicate results internally.

### **Mizkan Euro Renewable Electricity Statement**

At Mizkan Euro, we are committed to reducing our environmental impact & supporting the transition to a low-carbon future. In October 2022, we took a major step by moving our UK manufacturing to purchasing 100% renewable electricity.

We are proud to continue sourcing our electricity from renewable providers and will maintain this commitment into the future. Wherever commercially possible, we prioritise electricity generated from wind, solar and hydro over biomass to further minimise our environmental footprint.

This transition reflects our wider sustainability ambitions and our responsibility to the communities, customers and environment we serve.

Our manufacturing facilities and head office maintain action plans to deliver these commitments.

This policy is publicly available and reviewed periodically to ensure it remains appropriate to the organisation and its environmental and climate responsibilities.

Signed: Chikara Tanaka
